

KAMARA REYNOLDS

FULL STACK SOFTWARE ENGINEER

reynoldskamara@soulsitescoding.com > 516-668-2866 > Coral Springs, FL

[LinkedIn](#) > [GitHub](#) > [Portfolio](#)

Full stack software engineer with hands-on experience delivering responsive, dynamic web applications using React, Next.js, Flask, and SQL. Proven ability to design user-centric solutions, implement backend functionality, and contribute to cross-functional teams. Brings strong problem-solving skills, creativity, and a focus on delivering value to clients.

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frameworks & Libraries: React, Next.js, PrismaORM, Tailwind, Redux, Flask, Express, MUI, Bootstrap, SQLAlchemy, Sequelize

Databases: PostgreSQL, SQLite

Tools & Platforms: GitHub, Docker, Cursor, Render, Vercel

WORK EXPERIENCE

SOUL SITES >> Freelance Web Developer > Remote > Next.js, PrismaORM, Tailwind **October 2022 – Current**

- Delivered responsive, SEO-friendly websites tailored to client specifications, adding backend functionality as needed to enhance online visibility and customer engagement.
- Integrated third-party APIs and widgets to extend functionality and improve customer experience.
- Deployed and maintained production-ready sites on Vercel and Render, ensuring performance and scalability.
- Conducted thorough cross-browser and mobile responsiveness testing to ensure consistent performance across devices.

DECIMAL ENGINEERING >> Silkscreen Technician > Coral Springs, FL **March 2023 – Current**

- Helped open the new silkscreen department as the primary operator, applying creative solutions for various jobs.

ACV TECHS >> HVAC Technician > Margate, FL **August 2021 – March 2024**

- Learned the craft quickly, receiving my own truck and servicing clients on my own after a short time.

MATER BEACH ACADEMY & CARVER MIDDLE SCHOOL >> Math Teacher > Surf Side-Delray, FL **January 2017 – June 2021**

- Worked with lower students raising grades by providing custom lessons at skill level and recording individual progress.

PROJECT EXPERIENCE

BALLERS LAB LEAGUE >> Women's Basketball League Website > React, Redux, SQLAlchemy [Live Site](#) > [GitHub](#)

- Introduced game stat input system utilizing SportsVision API to provide up-to-date team and player stats of past games from video recordings.
- Designed dynamic React pages using useContext to display game days, individual games, and player statistics in an intuitive interface.

SEW POSH >> Upholstery Website > React, Next.js, MUI [Live Site](#) > [GitHub](#)

- Created a reviews page using Elf Sight to embed a widget with overall ratings, current reviews, and the option to add a review.
- Utilized Next.js and MUI to introduce interactive and dynamic gallery pages where pictures are populated based on the category which can be viewed in a slideshow and in full screen.

SOUL ACADEMY >> School Portal App > Next.js, PrismaORM, Tailwind [Live Site](#) > [GitHub](#)

- Developed an interactive grade book using React.js to supply teacher users the flexibility to create and edit assignments and grade in an easy-to-use interface.
- Utilized Flask and Redux to establish a dual-login system where user dashboard and site access are determined by whether the user is teacher or student.

EDUCATION

APP ACADEMY >> Full Stack Web Development **Completed January 2024**

ITT TECH >> Bachelor of Science in Electronic Engineering >> Fort Lauderdale, FL **Completed December 2015**
